10. BRIEF SUMMARY OF SIGHTING Tear shaped obj w/comet like tail. Front section generally rnd & a bright white & blue color. The trail- ing portion was an iridescent yellow & white. Obj disappeared almost instantly leaving no visible trail.		11. COMMENTS Characteristics of ^{meteor} sighting present.

Unidentified Flying Object as witnessed by:

[REDACTED]
[REDACTED]
Selma, Alabama

Mrs. [REDACTED] was standing in her yard when she heard a funny whistling noise. She glanced up and saw a strange object. The sound was not very loud and seemed to fade then return before the object disappeared.

The object moved through the air like a streak. It was mostly bright yellow with the front part a distinct blue. The blue portion was larger than the rest and altogether covered a good part of the sky.

It didn't seem too high in the air and was moving from left to right. It appeared to go up then dip and then straighten again. It seemed to be going up and away when it disappeared. The time that it lasted was about $4\frac{1}{2}$ seconds.

She turned to call her husband and by the time she looked around again it was gone - leaving no trace.

The sun was just coming up and the visibility was very good.

Ernest L. Pine

Investigating Officer

Information Services Officer, Craig AFB, Ala

I would like to report an unidentified object seen from an upstairs window in my [REDACTED] home, Selma, Alabama at 6:30 a.m., 21 February 1958.

The object was brilliant and incandescent. Its shape was like elongated tear drop. The front part was a blue green and violet glowing like a neon tube. The tail was like a comet, yellow and white. It moved in a 60° to 70° arc from Northwest to Southeast. Length of time visible was approximately 3-1/2 to 4 seconds.

It was impossible for me to determine the height, but my guess is that it was definitely very high.

Unidentified Flying Object as witnessed by:

[REDACTED]
Selma, Alabama

Mr. [REDACTED] was leaning against kitchen window looking at a bush outside when she heard a noise like the screech of a bird in distress. The noise was not like anything she had heard before.

Then she noticed what she thought was a cloud forming (moving from one side to the other) until it started to move to the right. She watched it momentarily, then looked out another window for something else and when she looked back it was gone.

The tail was iridescent and the center was light blue, but a darker blue than the sky. The center was quite bright - both white and blue. She did not see the right portion good enough to describe it.

The object left no trail and seemed definitely to be going away.

2011-12 GOVERNMENT FINANCIAL REPORT 2010-11 5475

SUPPLEMENT TO AF FORM 112

ORIGINATING AGENCY 361st Flying Training Wing Craig Air Force Base, Alabama	REPORT NO. R-1-58	PAGE <u>2</u> OF <u>4</u> PAGES
---	----------------------	---------------------------------

Following report is submitted in compliance with AFR 200-2. Per 15a

1. Teardrop shape with long tail.
2. Size of object was about that of a baseball held at arms length.
3. The front portion was a glowing blue to blue green color becoming bright yellow and white at the rear.
4. Only one object was apparent.
5. Not a formation.
6. No discernible features other than mentioned above.
7. The object left no trail. The tail was described as like a comet or a streak and holding a ruler at arms length was about 4-5 inches long.
8. A sound was heard; but was not identified. Described as being an odd whistling or screeching sound.
9. Not applicable.

Note! (See Myton, Utah -
10 Oct 57 case -

1. Two people observing the object had their attention called to it by the sound and the other observer happened to glance up and see it.
2. The object was sighted at an angle of elevation of 60-70 degrees ENE of Selma, Alabama.
3. It disappeared at approximately the same angle of elevation and east of Selma, Alabama.
4. The object's path was about parallel with the earth's surface with a slight dip then upward motion before disappearing. (moving left to right).
5. The object disappeared very rapidly to the east - described as having dissolved or faded.
6. The object was visible for approximately 4 seconds.

Paragraph 15c, APR 200-2.

1. Ground-visual.
2. Not applicable.
3. Not applicable.

Paratash 150, APR 200-2.

1. Shelling occurred at approximately 1225Z, 21 February 1958.
2. ~~DATA~~

SUPPLEMENT TO AF FORM 112

ORIGINATING AGENCY	REPORT NO.	PAGE	OF	PAGES
3615th Flying Training Wing Craig Air Force Base, Alabama	R-1-58	3	1	

Paragraph 15b, AFR 200-2.

1. Two observers were located near the center of the city of Selma, Ala., and made their observation through windows. The third observer was located approximately 3 miles SSE of Selma and was standing in her yard.

Paragraph 15f, AFR 200-2.

1. [REDACTED], Age 42, [REDACTED] Selma, Alabama, employed at Craig Air Force Base in Training Aids and Graphics.
[REDACTED] approximate age, 73 [REDACTED] Selma, Alabama, Housewife.
[REDACTED] 22 [REDACTED] Selma, Alabama

2. Not applicable.

Paragraph 15g, AFR 200-2.

1. The weather as observed by the observer was clear with light gray sky with the sun just coming up.
2. The existing wind conditions as reported by the Weather Station at Craig AFB was as follows: 6,000' - 310/8; 10,000' - 310/10; 16,000' - 290/120; 20,000' - 290/25; 30,000' - 290/24; 40,000' - 275/75; 50,000' - 300/50; 80,000' - no report.
3. No ceiling.
4. 6 miles hazy smoke restricted.
5. A high cirrus scattered condition with 1/10 coverage above 20,000'.
6. No thunderstorms in the area.

Paragraph 15h, AFR 200-2.

1. No meteorological or astronomical explanation could be found for the sighting.

Paragraph 15i, AFR 200-2.

1. The local search radar of the 2022nd AAIS Sq Craig AFB was inoperative at the time of the sighting.

Paragraph 15j, AFR 200-2.

1. There was no local traffic reported at the time by either military or civilian agencies.

Paragraph 15k, AFR 200-2.

1. Ernest L. Pyne, 1st Lt, USAF, Flight instructor.

Paragraph 15l, AFR 200-2: Not applicable.

Comments of preparing officer: There appears to be no logical explanation for the sighting from the information on hand. The observations appear quite valid, however no further investigation locally is recommended.
